
Jon Muller

Front-end developer

I have 20 years of professional experience working with HTML, CSS, Javascript, and design. Since 2001 I've run my own web development business in Cape Town, giving me a diverse skill set combining technical proficiency with leadership, management, and organisational skills.

I already travel to Sydney for family reasons, and I'm keen to make a permanent move. I'm hoping for new challenges, to create some inspiring work, and to make a difference with my depth and breadth of experience.
